

Klimaschutzplan 2050 = Morgenthauptan 2.0 ?

geschrieben von WebAdmin | 22. März 2016

Ein Bürgerdialog der keiner ist

Soeben veröffentlicht die Bundesregierung ihre Absicht im Sommer d.J. den „Klimaschutzplan 2050“ zu verabschieden. Nach Beendigung eines sog. „Bürgerdialogs“ am 19.2.16, an dem nur 428 „Bürger“ (von gut 80.000.000, die in Deutschland leben) teilnahmen, will sie deren Vorschläge in Gesetze und Verordnungen umsetzen. Weil diese „Bürger“ durch eine *„telefonische Zufallsauswahl in Stadt und Umland“* ermittelt worden seien, bildeten sie – so die unterschwellige Behauptung der Regierung- einen repräsentativen Querschnitt unserer Bevölkerung ab.

Doch nur 2.454 der 76.450 insgesamt Angerufenen zeigten sich überhaupt interessiert. Sie durften damit überwiegend zum harten Kern der „Klimaschützer“ hierzulande zählen“. Doch damit auch bei denen ja nichts anbrennt, man weiß ja nie, erhielten sie als Denk-Vorgabe den „Klimaschutzplan 2050“ zugesandt. Der hat aber wohl viele trotzdem abgeschreckt, denn nur 472 von Ihnen nahmen an den folgenden Veranstaltungen teil. Und nur noch 428 „Bürger “ also nur 0,55 % der ursprünglich Ausgewählten, beteiligten sich an der letztendlich bestimmenden Online-Umfrage. Mit dieser höchst selektiven Auswahl war sichergestellt, dass die so Befragten das richtige Bewusstsein mitbrachten und deshalb „richtig“ mitmachen würden. Unterstützt und vermutlich auch gelenkt von der ihnen zuvor zugesandten

Beeinflussungsliteratur des BMU

Nach dieser Vorarbeit verlief das Experiment zur vollen Zufriedenheit des Auftraggebers, wie die stolz auf der Homepage Bürgerdialog veröffentlichte wohl typische Aussage einer der Teilnehmerinnen zeigt:

„Ich fand es besonders toll, dass man als Bürger mit ins Boot geholt worden ist: Klimaschutz 2050! Hört sich weit an, aber wir müssen jetzt anfangen etwas zu tun“

Katharina Fechtner, Nürnberg

Organisator dieses, nach allen Regeln der statistischen Stichprobenerhebung hanebüchenen Verfahrens war lt Die Welt die Firma

IFOK. Ein auf Klima- und Energiethemen – im richtigen Sinne versteht sich- Beratungsunternehmen, das vom promovierten Biologen Hans-Peter Meister gegründet worden ist. Der war zuvor – welch merkwürdiger Zufall- u.a. Pressesprecher des Bundesministeriums für Umwelt, Naturschutz und Reaktorsicherheit gewesen war. Also genau des Ministeriums, dass ihn wenig später mit dieser wichtigen Aufgabe betraute. Seine Mission beschreibt die IFOK so:

„Als Trendsetter hat IFOK immer wieder beispielgebende Entwicklungen angestoßen. So war die Gründung der Tochtergesellschaft Meister Consultants Group (MCG) in Boston ein Treiber für neue Dialog- und Kommunikationsformate in den

**USA. Seit 2009 berät MCG
erfolgreich – inzwischen
weltweit – in den Themen
Energie- und Klimawandel.“**

Hervorhebung vom Autor.

Klimaschutzplan 2050

**Ziel des
„Klimaschutzplan
2050“ ist – zur
Rettung des
Weltklimas - die**

**fast vollständige
Dekarbonisierung
Deutschlands bis
2050. Insbesondere
will sich die
Regierung auf u.a.
folgende Maßnahmen
konzentrieren:**

**– Beendigung des
Verkaufs von
Verbrennungsmotore**

**n in Deutschland
für den Einsatz
bei Transport und
Verkehr bis 2030**

**– erhöhte
Grundsteuerhebesät
ze bei "Energie-
ineffizienten"
Immobilien**

–

Umstellungspflicht für Heizungen in Immobilien auf "EE"

**– Brennstoffsteuer
für Öl und Gas
(Heizungen)**

**– durchgängige
Tempo-30-
Begrenzung in**

Ortschaften

**– durchgängige
Tempo-120-
Begrenzung auf
Autobahnen**

**und ggf. Erfüllung
weitergehende
Forderungen von
ökofanatischen
NGO's wie**

– Ende des Kohleeinsatzes in Kraftwerken bis 2035.

Was bringt unsere CO2 Reduktion dem Klima?

"Wir verteilen durch die Klimapolitik de facto das Weltvermögen um. Dass die Besitzer von Kohle und Öl davon nicht begeistert sind, liegt auf der Hand. Man muss sich von der Illusion freimachen, dass internationale Klimapolitik Umweltpolitik ist. Das hat mit Umweltpolitik, mit Problemen wie Waldsterben oder Ozonloch, fast nichts mehr zu tun."

Es sei denn, dass die Menschen in diesem Land doch noch begreifen, dass es nicht um das völlig normale Klima, sondern allein um eine sozialistisch-grüne Ideologie geht.

Es sei denn, dass auch im politischen Lager endlich mal der Groschen fällt und sich handfester Widerstand organisiert. Mit dem Erscheinen der AfD und deren soeben veröffentlichten Programmentwurf scheint zumindest ein Funken Hoffnung berechtigt zu sein.

"This is the first time in the history of mankind that we are setting ourselves the task of intentionally, within a defined period of time, to change the economic development model that has been reigning for at least 150 years, since the Industrial Revolution," she said. "This is probably the most difficult task we have ever given ourselves, which is to intentionally transform the economic development model for the first time in human history."
