

# **Deutschland auf dem Weg in die « Dritte Welt »**

geschrieben von WebAdmin | 16. Juni 2016

Lieber Leser, seien Sie gewiss: ohne eine billige, zuverlässige und großindustriell nutzbare Speichertechnologie muss die Energiewende scheitern. Und diese Speicher-Technologie ist noch nicht erfunden, auch wenn die grünlackierten Experten noch so schrill das Gegenteil behaupten. Es sollte uns zu denken geben, dass kein einziges Land der Welt den deutschen Vorreitern folgt – Geisterfahrer ist stets der, dem alle anderen entgegenkommen.

## **Warum unbemerkt?**

**Die Energiewende surft auf einem Tsunami von Lügen und Unwissenheit durch ein Labyrinth voller Nebelbombenwerfer und Mochtegernexperten.**

**Energiesysteme sind komplizierte, schwer zu verstehende Zusammenhänge. Sie werden weder vom Laien noch von Journalisten oder gar von Politikern so einfach überblickt. Die Beschäftigung damit ist langweilig und erfordert tieferes Fachwissen. So kommt es, dass selbst eine Physikerin, die in Chemie promoviert**

hat, an eine Energiewende ohne industrielle Speicher glaubt. Aber sie glaubt ja auch daran, dass wir das schaffen.

Die von der Energiewende ausgelösten Erosionsprozesse der Wirtschaft sind schleichend und somit für den Laien fast unsichtbar. Da haben es Scharlatane leicht, die der Öffentlichkeit physikalischen Unsinn als Tatsachen verkaufen. Und alle fachkundigen Warner werden von einer grün-moralinsauren Inquisition an den Pranger gestellt, damit ja niemand auf die Idee kommt, ihnen zuzuhören.

Es fehlt auch nicht an Geld, um das Scheitern der Energiewende mittelfristig kaschieren zu können. Immer neue Kurpfuscherei an den Symptomen wird von der Politik eingeleitet. Zwangsbezahlt wird diese Vergeudung von inzwischen 27

**Milliarden Euro pro Jahr vom Stromkunden und Steuerzahler. Auch die Steigerung dieser gewaltigen Summe geht schleichend voran.**

**Die Profiteure und Scharlatane sitzen in den Redaktionsstuben, auf den politischen Machtpositionen und sogar in den „Expertengremien“. Sie behaupten unisono den selben physikalischen Blödsinn vom Endsieg der Energiewende: es ist bald geschafft, man brauche nur noch etwas mehr vom Selben (Geld) und ein paar Stromtrassen. Die Öffentlichkeit hat keine Chance, sich vernünftig zu informieren. Nunmehr, nach vielen Jahren Propaganda-Trommelfeuer glauben fast alle Menschen in Deutschland an eine erfolgreiche Energiewende.**

**Im benachbarten Ausland – ohne diese Propaganda – schüttelt man verständnislos den Kopf und baut an**

den Grenzen teure technische Schutzmaßnahmen, um sich vor den Folgen dieser irrsinnigen Energiepolitik zu schützen. Phasenschieber als Stacheldraht, um die Invasion der deutschen Dumping-Energie aufzuhalten, mein Gott!

**Warum kann die  
Energiewende nicht  
gelingen?**

**Stellen Sie sich  
vor, Sie wären  
stolzer Besitzer  
eines**

**revolutionären  
Öko-Volkswagens.  
Viele Windrädchen  
auf dem Auto-Dach  
und auch viele  
Sonnenkollektoren.  
Wenn der Wind weht  
und die Sonne  
scheint ist das  
Fahren damit eine  
Freude. Leider  
bleibt die Kiste**

**sofort stehen,  
wenn es dunkel und  
windstill wird,  
weil sie keinen  
Speicher hat, der  
die Energie hätte  
speichern können,  
während es auf dem  
Parkplatz stand.  
Im Gegenteil, Sie  
mussten die  
Windrädchen**

**blockieren und die  
Kollektoren  
abdecken, damit  
das Ökoauto sich  
nicht  
selbstständig  
macht, wenn Sie  
gar nicht fahren  
wollen.**

**Nun können Sie  
sagen: „Fahre ich**

**eben nicht, wenn  
kein Wind weht“ –  
für die Umwelt.  
Aber Sie sind  
Taxifahrer, Ihr  
Einkommen hängt  
gewissermaßen von  
der Kontinuität  
ihrer Fahrerei ab.  
Und einen  
Energiespeicher  
hat Ihr Auto**

**nicht, weil der  
noch nicht  
erfunden ist.**

**Was tun? Richtig  
geraten, Sie  
brauchen noch ein  
zweites Auto für  
diese Fälle, eines  
mit einem  
richtigen Motor,  
das auch dann**

**fährt, wenn's  
dunkel und  
windstill ist. Das  
ist machbar, aber  
teuer – Sie müssen  
zwei völlig  
gleichwertige  
Autos betreiben,  
eins für das  
passende Wetter  
und eines für  
immer dann, wenn**

**das Wetter nicht  
passt.**

***Abb. 1  
Netzeingriffe seit  
2007. Man sieht  
deutlich den  
exponentiellen  
Anstieg.***

*Grafik: M. Limburg;*

*Daten <http://www.netztransparenz.de/de/Redispatch.htm>*

**Genauso**

**funktioniert die  
Energiewende. Wir  
haben ein schönes  
Öko-Energie-System  
aus Wind und  
Sonne, das uns am  
8. Mai dieses  
Jahres sogar für  
ein paar Minuten  
voll mit  
Elektroenergie  
versorgte.**

**Manchmal wird  
sogar zu viel  
Strom erzeugt.  
Aber am 9. Mai  
war's vorbei mit  
Wind und Sonne und  
die  
Kohlekraftwerkssch  
ornsteine rauchten  
wieder. Der Strom  
kam für den  
Verbraucher wie**

**immer aus der  
Steckdose. Nur,  
vom Kunden  
unbemerkt, der  
konventionelle  
„Zweitkraftwerkspa  
rk“ machte den  
Strom.**

**Die Windmüller und  
Sonnenkönige ficht  
das nicht an, denn**

**den**

**Zweirkraftwerkspark**

**k bezahlt ja der**

**Staat. Der**

**französische**

**Präsident Hollande**

**hat mal im**

**Fernsehen gesagt:**

**„Das kostet**

**nichts, das**

**bezahlt ja der**

**Staat“.** Dazu hat

**er dümmlich  
gegrinst. Ein  
Wutschrei ging  
durch Frankreich.  
Dort weiß jedes  
Kind: der Staat  
kann gar nichts  
bezahlen, was der  
Steuerzahler nicht  
vorher erarbeitet  
hat.**

**Also, liebe  
Leser, den  
Zweikraftwe  
rkspark  
bezahlen  
Sie.**

**Selbst wenn die  
Sonne Tag und**

**Nacht 360 Tage im  
Jahr schiene und  
der Wind 364 Tage  
durchwehte,  
brauchten wir den  
ganzen**

**Zweitkraftwerksparr  
k mit 100%**

**Kapazität für die  
paar Stunden, in  
denen absolut kein  
Wind weht und**

**keine Sonne  
scheint. Sonst  
bricht das  
Stromnetz zusammen  
– es gibt einen  
Blackout. Das ist  
der unheilbare  
Konstruktionsfehle  
r der  
Energiewende. Die  
Gefahr eines  
Blackouts wächst**

**und wächst mit  
jedem  
konventionellen  
Kraftwerk, dass in  
diesem  
Subventionsgestrüp  
p pleitegeht und  
mit jedem neuen  
Windrad.**

***Abb. 2:***

**Netzeingriffe pro  
Jahr und  
Hochrechnung bei  
unverändertem  
Zubau. Wann der  
Blackoutpunkt  
erreicht wird, ist  
unbekannt. Das er  
erreicht wird ist  
sicher. Grafik: M.  
Limburg;  
Daten**

<http://www.netztransparenz.de/de/Redispatch.htm>

Was passiert bei einem großen Stromausfall?

**Nun könnten Sie  
sagen: „Für ein  
paar Stunden  
verzichten wir  
doch gerne mal auf  
Strom und machen  
es uns im  
Kerzenschein  
gemütlich. Für die**

**Umwelt! Das klingt  
auf den ersten  
Blick gut. Meinen  
Sie wirklich?**

**Ein großflächiger  
Stromausfall heißt  
„Blackout“. Hier  
mal eine kleine  
unvollständige  
Liste, was bei  
einem Blackout so**

**alles nach und  
nach nicht mehr  
funktioniert:**

- **Das Licht  
geht aus, auch auf  
den Straßen und in  
den Geschäften, in  
der U-Bahn, in den  
Fabriken...**

- **Tausende**

**Aufzüge bleiben  
stecken...**

▪

**Verkehrssampeln  
fallen aus, es  
entsteht ein  
Verkehrschao mit  
diversen Unfällen...**

▪

**U-Bahn,  
Metro und Bahn**

**bleiben stehen...**

- **Die  
Benzinpumpen an  
den Tankstellen  
fallen aus, es  
gibt keinen Sprit  
mehr...**

- **Geldautomaten und  
Ladenkassen**

**funktionieren  
nicht mehr, die  
Banken und  
Geschäfte  
schließen...**

**▪ Kühltrühen  
werden nicht mehr  
gekühlt...**

**▪ Das  
Telefonnetz und**

**Radio und  
Fernsehen gehen  
nicht mehr – außer  
ein paar  
batteriegeriebenen  
Geräte für kurze  
Zeit, dann fallen  
auch die Sender  
aus...**

**· Die  
Heiznetzwälzpump**

**e und die  
Elektronik Ihrer  
Heizung bleibt  
stehen, es wird  
kalt in Ihrem  
Haus...**

**· Das  
Leitungswasser  
hört auf zu  
fließen, da die  
Trinkwasser-Pumpen**

**nicht mehr laufen  
– Sie können ihre  
Toilette nicht  
mehr benutzen,  
sich nicht mehr  
waschen...**

**Hoffentlich haben  
Sie genügend  
Mineralwasser für  
die Familie im  
Haus...**

**· Alle elektrischen Kochstellen versagen, auch zum Wärmen von Babynahrung, die Leute fangen an und machen provisorische Feuer in den Wohnungen... es fängt an, hier und**

**dort zu brennen...**

▪

**Krankenwagen und  
Feuerwehr bleiben  
im Verkehrschaos  
stecken...**

▪

**Die  
Krankenhäuser  
werden über  
Notstromdiesel**

**versorgt – für  
zwei Tage ... dann  
ist der Diesel  
alle ... die Ärzte  
müssen die  
nichtversorgungsfä  
higen  
Intensivstation  
Patienten einfach  
sterben lassen  
oder eutanasieren...**

- **Der  
Notstand wird  
ausgerufen, es  
gibt  
Ausgangssperren...**

- **Plünderungen und  
Unruhen brechen  
aus...**

**Eine Studie des**

**Büros für  
Technikfolgen-  
Abschätzung beim  
Deutschen  
Bundestag (TAB)  
kommt zu dem  
Ergebnis, dass  
durch einen  
langandauernden  
und großflächigen  
Stromausfall alle  
kritischen**

**Infrastrukturen  
betroffen wären  
und ein Kollaps  
der gesamten  
Gesellschaft kaum  
zu verhindern  
wäre. Insbesondere  
die einschlägige  
Drucksache des  
deutschen  
Bundestages Nr.  
17/5672 vom Jahre**

**2012 verschweigt  
hier nichts mehr.  
Trotz dieses  
Gefahren- und  
Katastrophenpotenz  
ials sei ein  
diesbezügliches  
gesellschaftliches  
Risikobewusstsein  
nur in Ansätzen  
vorhanden – sagt  
Wikipedia**

**Bei einem Blackout  
dauert es oft  
mehrere Tage, bis  
das System  
systematisch  
wieder angefahren  
werden kann. Man  
benötigt  
„kaltstartfähige“  
Kraftwerke und  
muss nach und nach  
das ganze**

**Energiesystem  
wiederaufbauen.  
Einfach zuschalten  
geht nicht, da  
alle Verbraucher  
eingeschaltet sind  
und das Netz  
sofort wieder  
zusammenbricht.**

**In diesen wenigen  
Tagen wird es**

**viele Todesopfer  
geben: Kranke auf  
der  
Intensivstation,  
Verletzte von  
Unfällen und  
Bränden,  
Erfrorene, Opfer  
von Kriminalität  
und Unruhen. Die  
Schwächsten trifft  
es zuerst – Babys,**

**Kinder, Alte,  
Kranke.**

**Die Decke  
unserer  
Zivilisat**

**ion ist**

**dünn**

**Was ich**

**hier mit**

**Blackout**

**beschreib**

**e, ist**

**ein**

**Worst-**

**Case-**

**Szenario,**

**wenn auch**

**vielfach**

**geschehen**

**. Man**

**denke nur**

**an einige**

**Blackouts  
in großen  
USA -  
Städten  
und ihre  
Folgen.**

**Und die  
waren  
nicht mal  
flächende  
ckend.**

**Wenn Sie  
meine  
Beschreibung  
des  
Blackouts  
für**

**übertrieb**

**en**

**halten,**

**dann**

**stellen**

**Sie sich**

**bitte**

**folgende**

**Situation**

**vor: Sie**

**sind mit**

**dem PKW**

**und ihrer  
Familie  
auf der  
Flucht  
vor dem  
Chaos in**

**ihrer**

**Stadt zu**
