

Bundesverband der Industrie (BDI) ist komplett zu den Klimaalarmisten übergelaufen: Nach der Devise – If you cant beat them join them

geschrieben von WebAdmin | 7. September 2016

Man stelle sich folgende Situation vor: Ein sehr erfolgreicher Unternehmer, sozial eingestellt, seine Mitarbeiter großzügig entlohnend, überdies im Lande alle geforderten Steuern und Abgaben gern evtl. manchmal sicher auch zögerlich, entrichtend und der zudem Bewunderer und großzügiger Förderer einer intakten Umwelt ist, wird von zwei seiner Assistenten gebeten, an einem Konzept mitzuwirken, dass, wenn auch in Schritten, die völlige Stilllegung seines Unternehmens vorsieht. Und nicht nur das, er solle auch – als Vorbild für seine weltweiten Konkurrenten, die später sicherlich nachzögen, das wäre in einem Weltvertrag gerade beschlossen worden- schon mal mit einer umfangreichen Teilstilllegung anfangen. Darüber wolle man jetzt einen Aufruf schreiben, an dem er mitwirken solle, in welchem die ganze Welt dazu aufgefordert wird, es ihm gleich zu tun.

Begründet würde dieser Vorschlag, dass man sicher sei, dass in etwa 100 Jahren durch seine Unternehmen und deren Aktivitäten die Umwelt so leiden würde, dass niemand mehr für ihn arbeiten wolle oder könne. Das hätten nun mal wissenschaftliche Studien, welche die Zukunft auf merkwürdige Weise vorhersehen könnten, gezeigt. Diese dürften auch von niemandem angezweifelt werden, denn sowohl die Wissenschaft, als auch die Regierung hätten ihre Richtigkeit bestätigt.

Was würde der Unternehmer tun? Würde er die beiden – von ihm zudem fürstlich bezahlten Assistenten, die bis dahin für ihn in die Sterne geguckt, oder sich um den Hofgarten gekümmert haben- sofort zum Teufel schicken, oder würde er von ihnen zunächst mal Beweise verlangen? Um sie dann, wenn sie nichts vorweisen können, zum Teufel zu schicken?

Sicherlich würde jeder, der noch einen Rest Verstand besitzt, vermuten, dass der Unternehmer eines von beiden täte.

Doch das ist nicht das, was die Interessenvertretung der deutschen Industrie, verkörpert durch ein Mitglied der Geschäftsführung des Bundesverbandes der deutschen Industrie (BDI) tut. Sie willigt in dieses, für alle höchst schädliche Ansinnen ein und leiht dem Aufruf ihre Stimme und damit Gewicht.

Der BDI fordert den Untergang weiter Teile seiner Mitglieder hierzulande

Denn nun ist es amtlich. Auch der BDI schlägt sich uneingeschränkt auf die Seite derjenigen, die weite Teile der Industrie in diesem Land über die Dekarbonisierung zerstören wollen. Anders ist der am 1. September nur in der Printausgabe der Wochenzeitung „Die Zeit“ erschienene Aufruf „Gebt dem Schmutz einen Preis“ (hier hinter Bezahlsschranke) nicht zu verstehen. Als Autoren werden genannt: Holger Lösch; Mitglied der Hauptgeschäftsführung des BDI, Christoph Bals, politischer Geschäftsführer von Germanwatch und Otmar Edenhofer, Stellvertretender Chef des notorischen Potsdam Institut für Klimafolgenforschung (PIK) und Leiter des Mercator Research Institute on Global Commons and Climate Change (MCC) gGmbH.

Im Untertitel des Aufrufes schreiben die Autoren:

***Der Ausstoß von CO2 muss
kosten. Ein Aufruf von
Germanwatch, dem BDI und der
Wissenschaft ..***

Und weiter (Hervorhebungen von mir)

***Wie lässt sich Klimaschutz in
Industrie-, Schwellen- und
Entwicklungsländern finanzieren?
Diese Frage wird ein zentrales Thema
für die Weltwirtschaft, deren 20
wichtigste Mächte am Wochenende beim
G-20-Gipfel im chinesischen Hangzhou
aufeinandertreffen. Und die Antwort
darauf liegt auf der Hand: Das beste
Instrument für einen ökologisch
wirksamen und ökonomisch
vertretbaren Klimaschutz wäre ein
international abgestimmtes
Preissystem für den Ausstoß von
Kohlendioxid (CO2)...***

...Der Bundesverband der Deutschen

**Industrie, Germanwatch und das
Mercator Research Institute on
Global Commons and Climate Change
(MCC) stellen einen gemeinsamen
Vorstoß von Industrie,
Zivilgesellschaft und Wissenschaft
vor.**

**Wir wollen zeigen, dass sich der
scheinbar unversöhnliche Konflikt
zwischen Klimaschutz, Wachstum und
Wettbewerbsfähigkeit überwinden
lässt: durch internationale CO2-
Preise.**

**.. Wir fordern: Die deutsche Präsi-
dentschaft muss nach der Grundsatz-
einigung des Pariser Klimagipfels
nun die Chance nutzen, in der G 20
weiter gehende Absprachen
voranzutreiben...**

**In den kommenden beiden Jahrzehnten
müssen Industrie-, Schwellen- und
Entwicklungsländer Abermilliarden**

Dollar in den Aufbau und Ausbau von klimaverträglicher Infrastruktur stecken. Für manche geht es vor allem um allgemeinen Zugang zu sauberem Wasser und Strom. Für andere um bessere Verkehrs- und Energieinfrastruktur. Wir meinen: Die Politik kann und muss eindeutige Signale für globalen Klimaschutz setzen – durch weltweit abgestimmte Preise für den Ausstoß von CO₂.

Diese Preise sind gleich doppelt sinnvoll. Sie lenken erstens Investitionen. Und zweitens erzeugen sie Einnahmen, um den gigantischen Infrastrukturbedarf zu finanzieren.

.. Weltweite CO₂-Preise würden Investitionen in Richtung Klimaschutz lenken und Innovationen anstoßen, die Emissionen weiter senken. Zudem würden sie Ländern mit weniger entwickelten Steuersystemen die Chance eröffnen, künftige

Infrastrukturmaßnahmen zu finanzieren – und das sogar schon mit einem zunächst moderaten CO2-Preis. Deutschland sollte seine Führungsrolle in der G 20 nutzen, um mehr Investitionen in den Klimaschutz anzuregen. Der ideale Startpunkt wäre Hangzhou.

Damit lassen die Autoren die Katze aus dem Sack. Es geht ihnen allein um die

„Generierung“ von „Abermilliarden Dollar“ also „Einnahmen, um den gigantischen Infrastrukturbedarf zu finanzieren“.

"Wir verteilen durch die Klimapolitik de facto das Weltvermögen um. Dass die Besitzer von Kohle und Öl davon nicht begeistert sind, liegt auf der Hand. Man muss sich von der Illusion freimachen, dass internationale Klimapolitik Umweltpolitik ist. Das hat mit Umweltpolitik, mit Problemen wie Waldsterben oder Ozonloch, fast nichts mehr zu tun."

Zitat von O. Edenhofer in der NZZ anlässlich der Klimakonferenz von

Cancun (Details siehe oben rechts)

Diese sollen – nach Abzug der unvermeidlichen und viel Macht verleihenden Umverteilungskosten vorzugsweise via UN-Behörden- von den jetzt schon gebeutelten Verbrauchern der Industrieländer aufgebracht werden und den „Ländern mit weniger entwickelten Steuersystemen“ zugute kommen.

Scheute man sich in der Überschrift schon nicht davor, dass für unser aller Überleben unverzichtbare – aber sonst völlig harmlose Gas CO₂ sowie ungiftige, unsichtbare und nur in Mikromengen von rd. 4 Molekülen auf 10.000 Moleküle Luft, in „Schmutz“ umzubenennen, so bezeichnet man auch noch die vielen, vielen unter Korruption, Nepotismus und verbrecherischen Regimen leidenden Drittweltstaaten plötzlich vornehm als „Länder mit weniger

entwickelten Steuersystemen“. Und fordert dazu auf in diese Länder „Abermilliarden Dollar“ zu leiten.

**BDI Holger Lösch –
Mitglied der
Hauptgeschäftsführ
ung- ist mit von
der Partie**

**Und der BDI stimmt
nicht nur zu,
sondern stellt
auch noch einen**

**der Autoren dieser
Schrift. Und, da
nichts, aber auch
gar nichts von den
Unterstellungen,
in Bezug auf die
merkwürdige
Forderung zum
„Klimaschutz“,
die im Aufruf als
Weltübel genannt
wurde jemals**

**bewiesen wurde,
sondern
ausschließlich in
der Glaubenswelt
der Autoren
begründet ist,
lohnt es sich
einmal zu
überprüfen, wie es
denn um die
naturwissenschaftl
iche Kompetenz der**

**Autoren bestellt
ist.**

**Eines kann man
vorab schon mal
feststellen:
keiner der drei
hat
naturwissenschaftl
iche Kompetenzen,
weder allgemein,
noch in engeren**

**klimawissenschaftl
ich relevanten
Fächern, wie
Geologie,
Geographie,
Meteorologie oder
Physik,
Ingenieurwissensch
aften oder Chemie.
Damit erinnert das
Trio fatal an die
berühmte Ethik-**

**Kommission, die
den
unverantwortlichen
„Atomausstieg“
begründen half,
und ebenfalls frei
von jeder
Sachkenntnis war,
und viele andere
Gremien dieser
