

Nicola Scafetta – Surface temperatures: a discussion on equilibrium climate sensitivity

geschrieben von AR Göhring | 15. Dezember 2022

15. International EIKE Conference on Climate and Energy, IKEK-15, November 25th and 26th 2022, Pfännerhall Braunsbedra near Merseburg/Central Germany.

(Eine Übersetzung folgt. Bis dahin bitte unterm Video die deutschsprachigen Untertitel nutzen.)

CMIP6 GCMs and global surface temperatures: a discussion on equilibrium climate sensitivity ECS. Nicola Scafetta addressed two topics at once: On the first day he looked at the current computer models of the Intergovernmental Panel on Climate Change, called CMIP6; and on the second day he discussed the striking co-variability of terrestrial climate and solar cycles.
