

Nicola Scafetta: The planetary theory of the variability of solar activity – a review

geschrieben von AR Göhring | 21. Dezember 2022

Eine Übersetzung folgt. Bis dahin bitte unterm Video die deutschsprachigen Untertitel nutzen.

CMIP6 GCMs and global surface temperatures: a discussion on equilibrium climate sensitivity ECS.

Nicola Scafetta addressed two topics at once: On the first day he looked at the current computer models of the Intergovernmental Panel on Climate Change, called CMIP6; and on the second day he discussed the striking co-variability of terrestrial climate and solar cycles.
